clude 80mm are in compliance with AWWA-C205, and NSF-61 standards. The Production facility is implementing stringent quality measures in compliance with ISO9001 standards. For More information, click on [www.fip.ps](http://www.fip.ps).

## ARAB BROTHERS CONSTRUCTION AND INFRASTRUCTURE

Arab Brothers Construction Group is a private family owned construction business which was established in 1998 by the three brothers; Ahmad, Khaled, and Ali. The company has grown from a small contractor for the Telecommunication Utility Company (PAL-TEL) to be a leading civil engineering and construction contractor. The company started out with one goal in mind: secure those first contracts and acquire a good reputation in the construction market. Since 2005, the company has grown substantially and diversified its business to the construction of water systems, and Public buildings. In 2008, The Company has invested in the manufacturing of coated steel pipes and established its new brand FIP, thus; becoming an integrated solutions provider for customers in the water, and infrastructure sector. The Company has diversified into other technical fields, including sewage conveyance, treatment facilities, water pumping stations, roads, and industrial applications.
